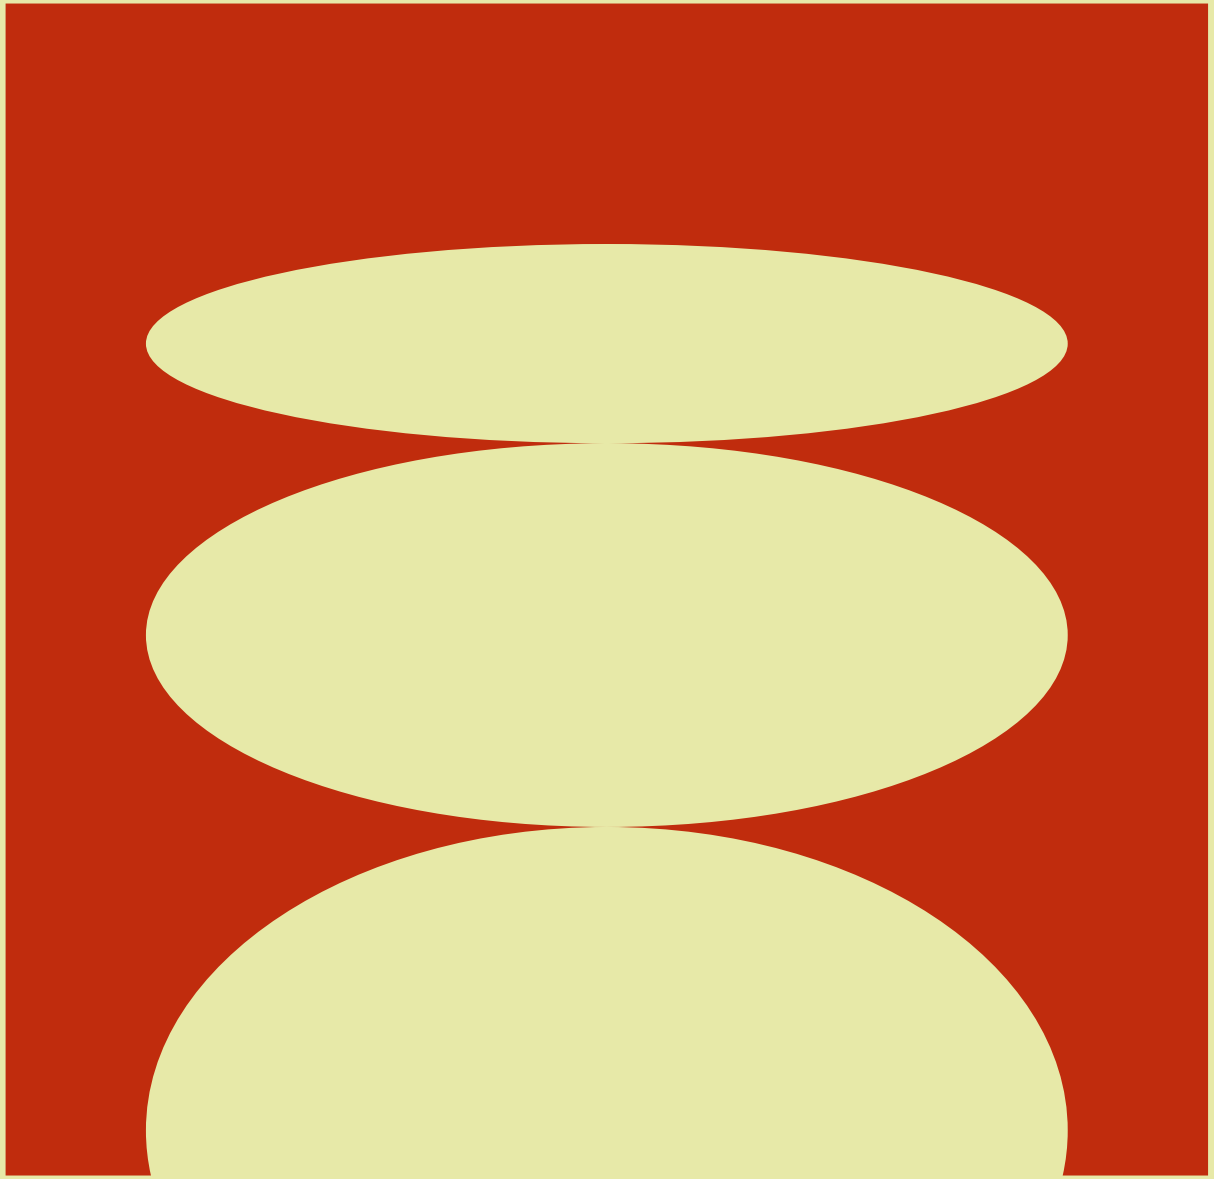
FPGAtors



# Spring GBM #2

# Agenda

1. Workshops Timeline
2. Robotic Arm update

# Workshop Timeline

# Timeline

Advanced Testbench: NEXT WEEK!! Will send a poll in Discord to find the best day → Week of March 2nd

Lecture from Dr. Kibria: LATE MARCH! Imparting valuable knowledge about EDA tools and miscellaneous things (online and recorded) → Week of March 23rd

Deciding between Clock Domain Crossing and Hardware Division Workshop to wrap up the semester → Week of April 9th

Possible 3DS Architecture Workshop?

# ROBOT ARM
# BRENNAN [BRENNAN]

# Updates

## Organization

Created a shared github repository

Compiled a list of current hardware

Talking to professors for possibility of more hardware / resources

## Deliverables

Bringing members up to speed with Vivado and SystemVerilog

Created UART transmit and receive modules

Researching the TMC 2209 (motor controller) to make a driver for it soon

https://github.com/borchertba/FPGator_Robotic_Arm

# THANK YOU!!
